EDUCATION

University of Nottingham
Sep 2016 - Jul 2020

MEng (Hons) Aerospace Engineering

Four-year integrated Master of Engineering degree accredited by RAeS and iMechE, achieving **II-1 classification**. Created software tools for optimising multi-planet space mission trajectories as part of my final year dissertation project. Effective communicator thanks to extensive collaborative work including year-long military aircraft design project entailing the development of software to determine landing gear design parameters and ease trade-off analysis during an agile and iterative design process.

Wymondham High Sixth Form Academy
Sep 2014 - Jul 2016

A-Levels:
Mathematics - A
Further Mathematics - B
Physics - B

Long Stratton High School
Sep 2009 - Jul 2014

10 GCSEs grade A*-B, including A* in Mathematics and A in English.

- Recipient of Norfolk County Scholar Award
- 120-hour TESOL certified

PERSONAL PROFILE

Adaptable individual seeking exciting employment in software development, combining a enthusiasm for programming and blockchain technology. Deep understanding of the industry having networked extensively whilst living abroad and personally investing in many sectors. Effective problem solver, experienced in group project environments.

EXPERIENCE

Ethereum developer proficient in **Solidity**, **JavaScript**, and **Truffle**. Architected an ERC-20 token with rudimentary token sale front end built with **React** and **Web3.js**. Designed and deployed several decentralised applications using **Remix IDE** to rapidly prototype, before performing unit testing in JavaScript using tools such as Truffle, **Mocha** and **Chai.** Familiar with the **DeFi** ecosystem along with **Open-Zeppelin**, **Ganache**, **GitHub**, **Git** workflows and **Node.js**.

CAREER BACKGROUND

Aug 2020 - Present

Freelance Software Developer - Self Employed

Created prototype Instagram growth tool, using Selenium and Python, for a client looking to grow a relevant and engaged audience for their business. Aforementioned software was later licenced out to other clients. Additional projects include webpage scraping, ecommerce platform migration tools and an ecommerce website built using Shopify.

Dec 2017 - Present

Discretionary Swing Trader - Self Employed

Developed and executed various strategies across a range of cryptocurrencies and derivatives. Led to an interest in quantitative finance and the creation of my own framework to analyse strategies using Python.

Dec 2020 - Apr 2021

Customer Care Operator - FM Outsource

Directly leased with large retailers and worldwide postal partners as a representative of P2P Mailing, a subsidiary of FedEx, to investigate parcels lost in transit, using multiple IT systems. Work entailed high level of responsibility in the form of decision making that directly impacted client relations.

Oct 2015 - Sep 2016

Customer Service Assistant - East of England Co-op

Continued development of interpersonal and communication skills, especially in the high-pressure environment of peak store hours.
