EDUCATION

University of Nottingham
Sep 2016 - Jul 2020

MEng (Hons) Aerospace Engineering

Four-year integrated Master of Engineering degree accredited by RAeS and iMechE, achieving **II-1 classification**.
Created software tools for the optimisation of multi-planet space mission trajectories as part of final year project. Effective communicator thanks to extensive collaborative work, including year-long military aircraft design project entailing the development of software for determining landing gear design parameters and easing trade-off analysis during an agile and iterative design process.

Wymondham High Sixth Form Academy
Sep 2014 - Jul 2016

A-Levels:
Mathematics - A
Further Mathematics - B
Physics - B

Long Stratton High School
Sep 2009 - Jul 2014

10 GCSEs grade A*-B, including A* in Mathematics and A in English.

- Recipient of Norfolk County Scholar Award
- 120-hour TESOL certified

PERSONAL PROFILE

Adaptable individual seeking exciting employment in software development, combining an enthusiasm for programming and blockchain technology. Effective problem solver adept in group project environments with over 3 years' experience in blockchain.

EXPERIENCE

Smart Contract developer proficient in **Solidity**, **JavaScript**, and **Truffle**. Designed and deployed several decentralised applications, as well as architecting an ERC-20 token and sale using **React** and **Web3.js**, implementing test-driven development techniques. Conversant with **DeFi** having employed concepts in projects, using **Remix IDE** for rapid prototyping and unit testing using tools such as **Ganache**, **Mocha** and **Chai**. Familiar with **Open-Zeppelin** libraries, **GitHub** and **Git** workflows.

CAREER BACKGROUND

Aug 2020 - Present

Freelance Software Developer - Self Employed

• Assortment of dApps and an ERC-20 token with rudimentary token sale front end, deploying on Ethereum test networks before client hand over.

• Contract work using Python for ecommerce clients looking to grow engaged audiences, migrate platforms and web scrape. Later licenced out audience growth tools on a subscription basis, achieving impactful results for businesses and emerging brands.

Dec 2017 - Present

Discretionary Swing Trader - Self Employed

Developed and executed strategies across a range of cryptocurrencies and derivatives, outperforming the market whilst minimising drawdown during volatile periods. Led to an interest in quantitative finance and the creation of my own framework to analyse strategies in Python.

Dec 2020 - Apr 2021

Customer Care Operator - FM Outsource

Directly leased with large retailers and worldwide postal partners as a representative of P2P Mailing, a subsidiary of FedEx, to investigate parcels lost in transit, using a multitude of IT systems. Work entailed high level of responsibility in the form of decision making that directly impacted client relations.

Oct 2015 - Sep 2016

Customer Service Assistant - East of England Co-op

Continued development of interpersonal and communication skills in the high-pressure environment of peak store hours.
